## HK(IFRIC) INTERPRETATION/IFRIC INTERPRETATION 23 *UNCERTAINTY OVER INCOME TAX TREATMENTS*

### STATUS

Final

### EFFECTIVE DATE

Periods beginning on or after 1 January 2019.

### ACCOUNTING IMPACT

Potentially impacts the measurement and disclosure of income tax assets and liabilities.

### Background

In June 2017, the IASB issued IFRIC Interpretation 23 *Uncertainty over Income Tax Treatments*. The HKICPA published the equivalent interpretation, Hong Kong (IFRIC) Interpretation 23 *Uncertainty over Income Tax Treatments* on 28 July 2017.

The Interpretation clarifies how to apply the recognition and measurement requirements in HKAS/IAS 12 *Income Taxes* when there is uncertainty over income tax treatments, addressing four specific issues

- ▶ Whether an entity considers uncertain tax treatments separately;
- ▶ The assumptions an entity should make about the examination of tax treatments by taxation authorities;
- ▶ How an entity determines taxable profit or loss, tax bases, unused tax losses, unused tax credits and tax rates; and
- ▶ How an entity considers changes in facts and circumstances

This Update summarises the requirements of HK(IFRIC)-Int/IFRIC 23.

### Consensus

*Whether an entity considers uncertain tax treatments separately*

HK(IFRIC)-Int/IFRIC 23 requires an entity to treat uncertain tax treatments separately or together depending on which method better predicts the resolution of the uncertainty. Factors which an entity might consider in determining the most appropriate approach include

- ▶ How it prepares its income tax filings; and
- ▶ How it is expected the taxation authority will investigate and resolve issues.

### *Examination by taxation authorities*

When measuring current and deferred income tax assets and liabilities HK(IFRIC)-Int/IFRIC 23 requires an entity to assume that a taxation authority will examine amounts that it has a right to examine and have full knowledge of all related information when making those examinations.

### *Determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates*

HK(IFRIC)-Int/IFRIC 23 requires an entity to make an assessment of whether it is probable a taxation authority will accept an uncertain tax treatment. If it is probable the treatment will be accepted then taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rate should be consistent with the treatment used or planned to be used in its income tax filings. If it is not probable the position will be accepted, then an entity reflects that uncertainty in one of two ways:

- ▶ An expected value approach. For example, an entity might have claimed deductions in its taxation filing related to transfer pricing and conclude it is not probable the taxation authority will accept the deductions claimed. If the entity expects the taxation authority's decision on one transfer pricing matter would affect, or be affected by, the other transfer pricing matters, then it would calculate a probability-weighted average of the possible outcomes arising from an investigation by the tax authorities in measuring income tax assets and liabilities.
- ▶ The most likely approach. For example, an entity may have acquired an intangible asset for CU 100 for which it is certain it will obtain a tax deductions, but for which the timing of the deductibility could be either 100% of cost in the year of purchase, or 20% of cost in each of the next 5 years. If the entity has claimed a current tax deduction of 100%, but expects the taxation authority to accept only a 20% deduction in each of the next 5 years, the entity would measure its current tax position in the year of purchase based on a current tax deduction equal to only 20% of cost. Its deferred tax position would assume a tax base of the asset equal to 80% of cost and not 0%.

### *Changes in facts and circumstances*

The accounting for uncertain tax treatments set out in HK(IFRIC)-Int/IFRIC 23 requires an entity to make estimates

and judgements about whether the relevant taxation authority will accept the position taken by the entity in its tax filings. HK(IFRIC)-Int/IFRIC 23 requires those estimates and judgements to be reassessed if the facts and circumstances on which those estimates and judgements are based change, or as a result of new information that affects the estimates and judgements. The effects of such changes should be reflected by applying HKAS/IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*. In addition HKAS/IAS 10 *Events after the Reporting Date* should be applied to determine whether such a change that occurs after the reporting period is an adjusting or non-adjusting event.

### **Disclosure**

When there is uncertainty over income tax treatments, HK(IFRIC)-Int/IFRIC 23 requires disclosure of:

- ▶ Judgements made in determining taxable profit or loss in accordance with paragraph 122 of HKAS/IAS 1 *Presentation of Financial Statements*;
- ▶ Information about the assumptions and estimates made in accordance with paragraphs 125-129 of HKAS/IAS 1; and

In addition, if it is probable that a taxation authority will accept an uncertain tax treatment, HK(IFRIC)-Int/IFRIC 23 requires an entity to consider whether there is a need to disclose the potential effect of that uncertainty as a tax-related contingency in accordance with paragraph 88 of HKAS/IAS 12 *Income Taxes*.

### **Transition**

On initial application, an entity may apply HK(IFRIC)-Int/IFRIC 23:

- ▶ retrospectively in accordance with HKAS/IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*; or
- ▶ retrospectively with the cumulative effect recognised by adjusting the opening balance of retained earnings on the date of initial application (i.e. the start of the accounting period in which HK(IFRIC)-Int/IFRIC 23 is first applied). In this case comparatives would not be restated.

### **Effective date**

HK(IFRIC)-Int/IFRIC 23 is effective for annual reporting periods beginning on or after 1 January 2019. Earlier application is permitted.
