FAQ - WHAT BENEFIT CAN A PRIVATE TRUST BRING YOU?

Asset protection: A sound asset protection trust (APT) strategy effectively separates your personal wealth and trusted assets in a way that protects your wealth from undesired claims from your creditors or those associated with matrimonial property, probate or legal inheritance issues.

Wealth succession: An APT can smooth out the wealth succession process in accordance with your own wishes, so as to avoid any unnecessary disputes between your beloved family members or the expropriation of your assets by third parties.

Education fund: An APT can provide financial support to your dependents, allowing them to receive education at their preferred educational institutions while the fund itself is preserved from being spent by the beneficiaries before they are mature enough to manage their wealth. In short, the APT ensures beneficiaries will be financially sufficient.

Tax benefits: Under certain circumstances, a carefully executed APT and tax planning can avoid or mitigate tax burdens from inheritance tax, income tax, property transfer tax – to name a few.
